ABOUT ME

An accomplished graphic designer now focusing on UI/UX, and graduate from the Graphic Design program at VIU, I love to create solutions to problems using design as a tool.

I've spent the last several years working on perfecting my craft as a designer, and I'm always looking for more challenges.

I'm hard working, tenacious, detail oriented, and most importantly: I love what I do. I bring this with me to work, creating a positive environment and yielding great outcomes by crafting the best solutions possible.

WORK EXPERIENCE

EVENTBASE TECHNOLOGY
UI/UX Designer
2016 - Present

I've spent the last near-two years working as a designer at Eventbase Technology, one of the largest event-centric app companies in the world, creating apps for companies like Microsoft and IBM, and events such as SXSW.

My duties at Eventbase have ranged from creating new UI for skinning our product as per client request, to creating new UX prototypes and workflows for new app features.

FREELANCE WORK
Graphic Designer
2011 - Present

Over the past several years I've honed my skills as a designer by working with a variety of different companies, start-ups and individuals doing work ranging from print and advertising all the way to UI/UX concepts and flows.

PORTAL MAGAZINE
Graphic Designer
2014-2015

I was given the opportunity of taking the content of Portal 2015's art and literature submissions and creating a fully realized 90-page full colour magazine, distributed nation wide.

Other tasks included crafting collateral and advertisements.
